ABOUT JOURNAL

The first issue of the Journal of Data Science, Informetrics, and Citation Studies is now available online at www.jcitation.org. This journal is devoted to the advancement of data science, informetrics, and citation studies, and aims to provide a forum for researchers in these fields to share their latest findings. The inaugural issue features articles on a variety of topics, including the use of data science in scholarly communication, the impact of data sharing on scientific research, and the role of data citation in academic publishing. We invite you to check out the Journal of Data Science, Informetrics, and Citation Studies and join us in promoting these important fields of research. Data science, informetrics, and citation studies are cutting-edge fields that are constantly evolving. In order to keep up with the latest advancements, the Journal of Data Science, Informetrics, and Citation Studies was created. This peer-reviewed journal covers every aspect of these fields, from theory to practice.

The Journal of Data Science, Informetrics, and Citation Studies is a new online journal that aims to provide a forum for scholars working at the intersection of data science, informetrics, and citation studies. The journal will publish original research articles, review articles, case studies, and book reviews.

PURPOSE

The newly launched Journal of Data Science, Informetrics, and Citation Studies is a scientific journal that focuses on research related to data science, informetrics, and citation studies. The journal aims to provide a forum for scholars to share their latest research findings and to promote scholarly exchange between researchers in these three fields.

TARGET AUDIENCE

The Journal of Data Science, Informetrics, and Citation Studies is aimed at academics and researchers with an interest in data science, informetrics, and citation studies. The journal aims to provide a forum for discussing the latest research and developments in these fields.

TYPE OF ARTICLES

The types of articles that will be published in the different sections of the Journal of Data Science, Informetrics, and Citation Studies (JDSICS) are those that are most relevant to the study of data science, informetrics, and citation studies. In particular, we will be interested in articles that:

1. Discuss the latest developments in data science, informetrics, and citation studies.

2. Offer new perspectives on data science, informetrics, and citation studies.

3. Disseminate new research findings on data science, informetrics, and citation studies.

4. Offer practical advice on how to conduct data science, informetrics, and citation studies.

5. Review recent books or papers on data science, informetrics, and citation studies.

ARTICLE SUBMISSIONS

Are you a scholar in the fields of data science, informetrics, or citation studies? If so, we invite you to submit an article for publication in the Journal of Data Science, Informetrics, and Citation Studies (JDSICS).

JDSICS is a new, peer-reviewed journal that focuses on research related to all aspects of data science, informetrics, and citation studies. We welcome submissions from scholars worldwide. Please send your manuscript to https://jcitation. org/index.php/jdscics/login to be considered for publication. Include your name, affiliation, contact information, and a brief biographical statement with your submission. Articles should be between 4,000 and 8,000 words in length and formatted according to the JDSICS style guide (available at www.jcitation.org). Please note that we only accept electronic submissions currently.

CONCLUSION

We are excited to announce the launch of the first issue of the Journal of Data Science, Informetrics, and Citation Studies.

This peer-reviewed journal will focus on cutting-edge research in data science, informetrics, and citation studies. We believe the journal will become an important platform for exchanging ideas and advancing knowledge in these rapidly growing fields.

This journal is dedicated to promoting research in these three areas. In this inaugural issue, we have included articles on a variety of topics, including data science methodology, informetrics theory, and citation analysis. We believe that this journal will be a valuable resource for scholars and students interested in these fields.
